

SUMMARY OF UNREGULATED CONTAMINANT MONITORING INFORMATION

EPA's third Unregulated Contaminant Monitoring Rule (UCMR 3) required approximately 5,000 public water systems to monitor for PFAS between January 2013 and December 2015. The chemicals that were measured are PFBS, PFHpA, PFHxS, PFNA, PFOA, and PFOS. The table below provides a list of public water systems where at least one sample tested positive for one or more PFAS. The original data is available at: <https://www.epa.gov/dwucmr/occurrence-data-unregulated-contaminant-monitoring-rule#3>.

D - The number of sampling events for which any PFAS had a result above the Minimum Reporting Level (MRL).

E - PFAS chemicals with a result above the MRL in any sampling event

F - The number of sampling events where the sum of PFOA and PFOS was ≥ 70 ppt

G - The max. value of the sum of all PFAS that were detected above the MRL in a given sampling event

A	B	C	D	E	F	G
#	State	Public Water System Name	# of Sample Events that Detected Any PFAS	PFAS Detected	# of PFOA and PFOS Samples Above HAs	Max. Value (ppt)
1	Alabama	Albertville Utilities Board	2	PFHpA, PFOA	0	30
